Summary

AIML undergraduate experienced in building full-stack AI applications and end-to-end machine learning systems. Skilled in integrating ML models and Generative AI APIs into scalable web applications using Flask, REST APIs, and Docker. Passionate about building real-world products combining AI, automation, and modern web technologies.

Education

RV University B.Tech (Honors) in Artificial Intelligence and Machine Learning Minor: Business Administration GPA: 8.0/10.0	2023 – 2027
--	-------------

Projects

Interactive Quantum Computing Simulation Game - Built an interactive educational web application using JavaScript, HTML, and backend APIs. - Implemented simulations demonstrating quantum states, superposition, and quantum gates.	2026
AI Image Generation Web Application Built an AI application integrating Generative AI APIs for real-time image generation.	2025
Real-Time QR Code Detection using YOLOv8 - Developed a computer vision pipeline using YOLOv8 for real-time QR code detection. - Performed dataset annotation and augmentation to improve detection robustness.	2025
Fruit Classification using Decision Tree (92.5% Accuracy) - Extracted color, texture (LBP), and shape-based features from fruit images. - Trained a Decision Tree classifier achieving 92.5% test accuracy.	2024
Automated Waste Segregation System - Built an Arduino-based smart dustbin using IR and water sensors for waste classification. - Implemented microcontroller logic for automated real-time segregation.	2023

Technical Skills

Programming: Python, JavaScript, C++, Java, C
Core CS: Data Structures, Algorithms, OOP
AI & Machine Learning: PyTorch, Scikit-learn, Decision Trees, Random Forest, Feature Engineering, Model Evaluation
Generative AI & NLP: LLM API Integration, Transformers, HuggingFace, Text Processing, Prompt Engineering
Web Development: Flask, REST APIs, HTML, CSS, API Integration
Databases: SQL, MongoDB (basic)
Data Tools: Pandas, NumPy, Matplotlib, Jupyter Notebook
Tools: Git, GitHub, Docker, Jira, Arduino
Soft Skills: Effective Communication, Problem Solving, Collaboration, Fast Learning

Achievements

- NPTEL – Design and Implementation of Human-Computer Interfaces [\[Certificate\]](#)
- Udemy – Full Stack Web Development Certification [\[Certificate\]](#)
- Built and deployed 5+ end-to-end AI/ML and AI-powered web applications
